paysafecard

paysafecard is a prepaid voucher that lets you pay safely online. Prepaid means that you purchase paysafecard from sales outlets worldwide and you will receive a 16-digit PIN. Online payments are made by entering this paysafecard PIN on websites where paysafecard is accepted. paysafecard is safer than other payment methods because you don't have to enter any personal information or your bank or credit card details when paying online.

Please note that paysafe will display your store(s) address and contact details on the international paysafecard website (www.paysafecard.com) so that customers can easily find outlets that sell paysafecard vouchers.
