Lotto Barcode Setup

Last Updated at Today at 08:39

Tattersalls and Golden Casket have recently introduced new barcodes in some states which allow you to scan their printed tickets at point of sale. The following steps will allow you to set this up quickly and easily. Scanning the vouchers at point of sale will make reconciliation at the end of the day a much easier process.

NOTE: For the lotto barcodes to work you must be on Retailer version 2.6 or later. You can see the version number on the top right corner of Retailer.

Setting Up Lotto Barcodes

1. From the main screen of Retailer, click on *Stock -> Stock Screen*.
2. Click on the *Add* button on the bottom-left.
3. In the Barcode section, press [Alt]+[G].
4. In the PLU section, enter as in the table below.
5. Click *Next*.
6. Put in your product description as you want it to appear on receipts and in the point of sale screen.
7. Click *Next*.
8. Select the department in the table then click *Next*.
9. Select the correct supplier and leave all the QOH settings as they are. Click *Next*.
10. Set your tax group and leave all the pricing options as they are. Click *Next*. You may get a warning that you have not set a retail price. Click *Ok*.
11. In the next screen the only tick box that should be ticked is the first one asking whether the item should be allowed to be discounted. This can either be ticked or un-ticked depending on your businesses preference. All other boxes should be un-ticked. Click *Next*.
12. Leave the newsagency specific settings as they are and click *Finish*.
13. Repeat this process for each different lotto game type using the PLU's and descriptions in the table provided.

STOCK ITEM	PLU	DEPARTMENT
Syndicate	X7400	LOTTO

Prize Claim	X7440	LOTTO PAYOUT

Scanning Lotto Tickets

Once the stock item has been set up you will be able to scan any lotto ticket that is printed from your lotto terminal. Simply scan the Pos Barcode with your scanner and the price will automatically be picked up from the barcode. The description will be taken from the stock item we have just set up.
